- the oral flora remains in balance
- improvement of oral hygiene

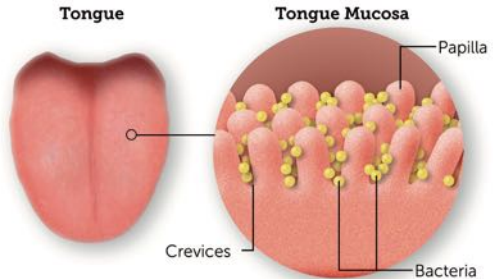

### Sensory effects

- continuing fresh breath
- improved sense of taste
- clean, pink tongue

# „The mouth is the entrance of the diseases and the source of all suffering“ (Chinese proverb)

That's why the tongue is like the red carpet at the entrance.

A "clean carpet", in other words a clean tongue, is the basis for good oral and general health. For some time science has been concerned with a holistic treatment approach in the professional teeth cleaning, which also reflects the fact that about 2/3 of all germs in the mouth are on the tongue. The tongue structure is similar to a deep pile carpet. The bacteria settle especially in the crevices between the papillae.

## The solution for the dental office

The TS1 Tongue Vacuum Cleaner is an effective tool for professional deep cleansing of the tongue in the dental office.

## Just one minute to a clean tongue!

After teeth and interdental spaces have been treated in the context of professional teeth cleaning, the bacterial tongue coverings are finally aspirated with the new TS1 Tongue Vacuum Cleaner. Additional time required: only about one minute.

The result of a tongue cleaning is immediately visible. Like a deep pile carpet, which is cleaned with a vacuum cleaner, you can see the cleaned surface on the tongue after passing over it with the lamella side of the TS1 Tongue Vacuum Cleaner.

## For sustainable tongue cleaning at home

By attaching the TS1 onto the handle, the TS1 vacuum cleaner becomes an effective tongue cleaner for the treatment at home.

With kind regards: Your dentist
